P81 Log Splitter Valve

## P81系列劈木机专用阀

### P81 Log Splitter Valve

---

P81 型劈木机阀是通过手柄的动作使阀芯做轴向移动从而对油路进行切换的直动式换向滑阀。此劈木机阀自带过载保护，结构紧凑，控制灵活，使用方便可靠，专用于劈木机的油路控制，能使劈木机快速、平稳工作。

P81 type splitting machine valve is through the lever cation make valve core do axial movement and the oil circuit to switch straight acting reversing valve. The splitting machine valve owns overload protection.compact structure,flexible control,easy to use and reliable,dedicated to splitting machine oil circuit control.Can make the splitting machine fast and stable work.

### 参数 Specifications

额定流量 Nominal flow rate	95 L/min	25 US GPM
最大工作压力 Operating pressure (max)	250 bar	3626 psi
工作粘度范围 operating range	15 ~ 75 mm <sup>2</sup> /s	15 ~ 75 cst
粘度 Viscosity	最小 min	12 mm <sup>2</sup> /s 12 cst
	最大 max	400 mm <sup>2</sup> /s 400 cst
环境温度 Ambient temperature range	-40° ~ 80°C	-40° ~ 176°F
跳位压力 Kick out set pressure	70-140bar	1015-2030 psi
